

Southwater Junior Academy Science Home Learning w/c [INSERT DATE]

YEAR 3

In year 3 we have been looking at Rocks and Soils. You might like to have a go at making your own mini wormery here: <https://schoolgardening.rhs.org.uk/Resources/Activity/Mini-wormery>

YEAR 4

In year 4 in science we have been looking at our super human bodies. Have a look at this website <https://www.nhs.uk/change4life/activities>. You could try some of the activities or even try a new recipe!

Year 5

In year 5 we have been learning about forces. You might like to have a look at this webpage <https://learning-resources.sciencemuseum.org.uk/resources/make-it-fly/> and have a go at making different types of flying machine. You could also think about how you would record the results!

YEAR 6

Earlier this year we learnt about how some materials can change state (move from solids to liquids and even gasses). Learn how to make home-made ice cream here <https://learning-resources.sciencemuseum.org.uk/wp-content/uploads/2019/02/SMG-Learning-Activities-Instant-Ice-Cream.pdf>. Can you think of other times when you might be able to use this technology?
